

# President of Thai Automotive Industry Association

**T**he capability of Thai automotive industry is rated in the top class and has a broadened industrial boundary, comprised of automobile manufacturing, automotive parts manufacturing and motorcycle manufacturing plants which it can be said currently the world's big companies have come to make investment in Thailand, while there is even more spaces available for some newcomer investors to set up their manufacturing bases in the country.

In order to maintain the standard in automobile & part manufacturing industry, the quality control is considered as the key to achieve that which for over 34 years, Thai Automotive Industry Association (TAIA) has helped enhancing the competitiveness of automotive and parts industry by providing useful information on the innovation and manufacturing technology to its members and all stakeholder in this related industry so that they can produce the high quality automobiles and parts to reach the market requirement.

Now, we are so delighted to see the effort of the related agencies to promote the industrial development by publishing the Directory of Thailand Auto Parts Testing & Testing Equipment Services 2015/2016. This directory will truly enhance the quality of automobiles and automotive parts manufactured as well as increase the level of confidences to automobile assemblers who use Thailand as their manufacturing bases for export.

On behalf of TAIA, I would like to thank National Science & Technology Development Agency (NSTDA), Thailand Automotive Institute (TAI) and Green World Publication Co., Ltd. for publishing the Directory of Thailand Auto Parts Testing & Testing Equipment Services 2015/2016, considered as the most comprehensive source for all automotive parts manufactures, automobile assemblers and related entrepreneurs. This directory has also widened our contact base, and broadened our resources for collaborative development.
